

REMARKS

In accordance with the foregoing, claims 4 and 19 have been amended. Claims 4, 5, 7-10 and 12-30 are pending and under consideration. Claims 1-3 are withdrawn from consideration.

The rejection based on Chen (U.S. '589) is respectfully traversed. Independent claim 4, used herein as an example, recites a second part having a relatively low UV transmission rate and a fourth part having the relatively low UV transmission rate of the second part. The Examiner relies upon the lower intensity electromagnetic energy 12 in FIG. 9E of Chen as corresponding to the claimed second and fourth parts. However, FIG. 9 is a cross sectional view of a round element (see FIGS. 6A and 6B). Thus, the lower intensity magnetic energy on the left and right sides of FIG. 9E is the same part. Thus, a single part is disclosed, as opposed to the claimed second and fourth parts.

Accordingly, withdrawal of the rejection is requested.

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
